GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Dear Mr. Williams:

STATEMENT OF WATER DIVERSION AND USE NO 10565 – TRINITY RIVER IN TRINITY COUNTY

This is in response to your submittal of the Supplemental Statement of Water Diversion and Use No. 10565 (Statement) and your subsequent telephone call on July 28, 1998. You informed our office that you are now the owner of Parcel No. 24-190-63 which is served by the above Statement. The original filing was submitted by your parents, Roy and Betty Williams. Our records will be changed to show ownership of Statement of Water Diversion and Use No. 10565 in the name of Roy Williams.

Enclosed are copies of the original Statements No. 10565 and 10056 that were submitted by your parents. Also enclosed is our pamphlet and cover letter that gives more information about Statements.

If I can be of further assistance, please write or call me at (916) 657-1931.

Re: Estate of Betty Lou Williams

Dear Roy:

I enclose a copy of the letter I received today from the Million's attorney. We should discuss this at your earliest convenience.

Very truly yours,

ALFRED S. WILKINS

ASW/js
Enclosure

respect to the septic system, we would give an easement for use and maintenance of the present septic system, but with the provision that if a new septic system must ever be installed, that it be installed on Mr. Williams' property.

Next, with respect to the water supply, ~~we propose that the Millions will install their own irrigation system so that they will not need to use the existing irrigation system. They will give an easement for the existing irrigation line through their property.~~ At the same time, Mr. Williams would agree to use his own domestic water supply. It is my understanding that Mr. Williams' residence has its own water supply which is reliable for only part of the year. For the other part of the year, I understand that he has the capability of filling his well from the irrigation line. Doing this would avoid Mr. Williams having any responsibility over maintenance or reimbursement for the costs of a shared domestic water supply.

Obviously, this arrangement could not be put into effect immediately. Mr. Williams would have to make the appropriate changes in his water system and the ~~Williams~~ ^{Millions} will have to confirm that they have a valid BLM Special Use Permit for the new irrigation system and they would also have to install the new irrigation system. I suspect that this could all be done no sooner than late summer or early fall.

Finally, in order to expedite matters, I would like you to know that I have absolutely no objection to you and the Millions speaking with each other if your doing so will expedite matters. I do however want to review any documents which are to be signed by the Millions.

Please give these issues some thought and let me know your's and your client's responses. As always, I look forward to hearing from you.

Sincerely,

REESE, SMALLEY, WISEMAN & SCHWEITZER

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:
